inaya

inaya POS Pricing
2022

Cost Types

inaya has two types of costs:

- Implementation Costs
- Running Costs

Implementation Costs

Implementation costs are the initial costs required to implement inaya at your site. Because of this they are required to be paid at once before inaya is installed and implemented at your site.

Running Costs.

Running costs are required to maintain a healthy running implementation of inaya. They last for the lifetime of the product and are charged on a monthly basis. This covers the cost of

- License
- Support And Maintenance
- Offsite Backup
- Continuous upgrades

For clients who have a *good internet connection* and prefer **not** to have a physical server on site they can opt to rent cloud servers via the cloud hosting plan.

inaya Editions

Furthermore inaya is sold in three editions.
- Lite Edition
- Standard Edition
- Premium Edition

The editions differ in the number of features they have with Lite Edition having the smallest amount of features and the Premium edition having the largest amount of features.

Lite Edition

inaya Lite Edition is the most affordable edition of inaya. It has just the minimum amount of features running. It includes all the features of inaya except the ones found in Standard Edition and Premium Edition.

The feature it contains

- Register items in store
- Item Batch management
- Block item
- Stock management
- Expiry Date notifications
- Multi stores
- Payment by cash/prepaid
- A4 and Thermal receipt printing.
- Advance payment
- Cash box management
- Pending Bills Tracking
- Bill discount
- Multi level Approvals
- Barcode scanner
- Customer management
- Sales reports

Standard Edition

The standard edition of inaya is the most pragmatic edition of inaya. It adds a couple of features to the Lite Edition to tackle more complicated problems of your organization.

The features it adds are:

- Multiple Locations
- Vendor Based Procurement
- Purchase Report
- Loyalty Programs
- Multi Currency
- Multiple Billing Categories
- Credit Sales (Postpaid and Invoices)
- Manufacturing
- Restaurant/ Bar Mode

Premium Edition

The premium edition of inaya is the most comprehensive and versatile edition of inaya. It lives to the holistic approach of inaya by being able to touch most (if not all) aspects.

Its built on top of the standard edition and adds the following features:

- IFRS Accounting
- Budget
- Inventory Requisitions
- Asset Tracking
- Payroll

Pricing

The pricing is based on the number of users that will be logged in at the same time. We call these **live users.**

You will pay the implementation fee once before the start of the implementation. After implementation is over you will then start to pay a fixed amount per month.

Implementation Costs -- TZS

No Of Live Users	Lite	Standard	Premium
2	250,000	400,000	750,000
5	500,000	750,000	1,000,000
10	750,000	1,500,000	2,000,000
20	1,500,000	2,500,000	3,500,000
35	2,500,000	4,000,000	6,000,000
